

## Remithome

We strongly recommend that our US-based clients send their payments to Century Communities via remit home, a web-based remittance service that offers a secure, reliable and affordable way to send money from the US to the Philippines . With remit home, you can make your payments from your home or office – or from any computer with internet access. You can even schedule your payments to be made automatically every month, so you will never have to worry about forgetting monthly amortizations – and fees are even lower when you schedule your payments as recurring transfers!

For a detailed step-by-step guide on how to use remit home to send payments to Century Communities, [click here](#). You will need Adobe Acrobat reader 6 to view this file.
